Good for Government™

Good Mobile Messaging™ S/MIME

Discover what a good mobile experience should be. Good Mobile Messaging S/MIME puts your organization on your handheld. It delivers your organization's calendar, contacts, signed and encrypted e-mail and more — in real time.

For mobile government personnel, every mile and every minute matters. Staying productive requires staying connected to colleagues and constituents. Good Mobile Messaging S/MIME is a wireless e-mail solution that extends S/MIME security benefits such as authentication, privacy and integrity of e-mail to Windows Mobile® smartphones. In addition, Good Mobile Messaging S/MIME is designed to work with Department of Defense (DoD) Public Key Infrastructure (PKI) and Common Access Cards (CACs). Leading government agencies are benefiting from the Good Mobile Messaging advantages:

An Unparalleled User Experience

Good Mobile Messaging S/MIME's intuitive user interface ensures that you get up and running quickly while allowing you to personalize the way you view, prioritize, and find information. Good also allows you to select RSS news feeds so that you can stay up-to-date with the information you care about. Plus an easy 3-click Smartcard pairing simplifies secure communications.

End-to-End Security

Good Mobile Messaging S/MIME provides end-to-end encryption that protects the agency firewall, over-the-air (OTA) transmissions and the smartphone itself. Since it is fully integrated

with Good Mobile Control, IT administrators can remotely control device components including camera, Bluetooth, SD cards, and more. IT can also prevent users from running certain applications, encrypt SD cards and folders, and mandate compliance with IT policies.

Simplified IT Control

Installations and upgrades of Good Mobile Messaging S/MIME as well as other handheld software and policies are done completely OTA. With the Web-based Good Mobile Control portal, IT can access management and security capabilities from virtually anywhere. IT personnel spend less time managing desktop software and smartphones while users spend more time connected and productive.

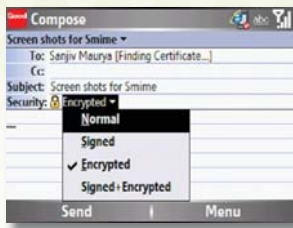

Visibility of the Entire Mobile Fleet

Minimize troubleshooting and support costs with real-time visibility of the entire mobile deployment, including hardware type and version, software versions and even handheld radio status.

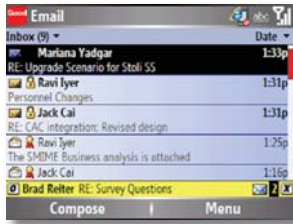

Device and Network Choice

Good Mobile Messaging S/MIME gives you the power to choose from multiple Windows Mobile powered handhelds from leading carriers, so you get maximum flexibility and avoid vendor lock-in.

A good mobile experience - for everyone.

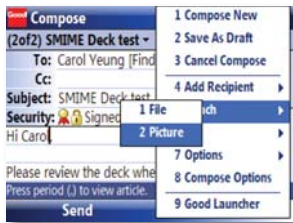

Sends signed and encrypted messages.

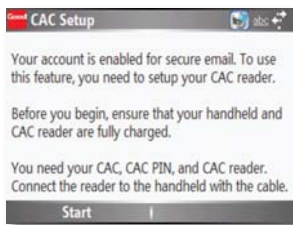

Easily identify signed and encrypted e-mails.

Automatically verify certificates from the server.

Sends signed and encrypted attachments and pictures.

Pair CAC reader to smartphone in 3 easy clicks.

GOOD FOR USERS.

As intuitive and familiar as your desktop — Good Mobile Messaging S/MIME* is optimized for use on Windows Mobile® smartphones. Tasks such as composing encrypted or signed e-mail, viewing rich attachments, or scheduling meetings are just clicks away. And because Good Mobile Messaging S/MIME lets users run several applications at once, it's as easy to multi-task as it would be on a laptop or desktop PC. Key user features include:

S/MIME highlights

- Compose, send, receive and read signed and/or encrypted e-mail
- Support for secure Bluetooth and USB CAC reader communication†
- Intuitive 3-click CAC pairing
- Verify certificates from handheld
- Automatically verify certificates from server
- Server-based certificate look-up and validation via LDAP and OCSP
- Support for Name Check Suppression
- Automatic, hassle-free access to certificates stored in personal contacts

E-mail highlights

- Create, send, receive, delete, file, search and sort e-mail
- View e-mail via preview pane, single-line display or two-line display
- View and send rich attachments
- Synchronize e-mail sub-folders

- Prioritize and filter e-mail date, sender, conversations, follow-up flag and more
- Conversation view allows rapid processing of complex threads
- Global Address List (GAL) lookup to access your organization's directory

RSS and News Feeds

- Good Mobile News RSS reader is integrated with your Good e-mail and PIM interface

Calendar highlights

- Check free/busy status of invitees
- Automatically find available rooms
- View and accept meeting invitations
- Daily, weekly and monthly viewing

Contacts highlights

- Search, edit, add and delete contacts
- Manage public, shared and personal contacts
- Automatic caller ID integrated with contacts

GOOD FOR IT.

Always secure, easy to manage — Good Mobile Messaging S/MIME requires a single, behind-the-firewall server that can be installed in about an hour. And because it's fully integrated with Good Mobile Control, it's easy for IT managers to maintain because it allows for wireless OTA management of all mobile software, policies and settings. Key features include:

Security

- Designed for HSPD 12 and DoD 8100.2 Compliance
- FIPS 140-2 Certified
- No inbound firewall holes
- Remote control of password policies
- Remotely erase the device if it is lost
- Remote control of handheld components like cameras, Bluetooth, Infrared, SD cards, etc
- Enforce compliance with IT policies by defining mandatory applications
- Prohibit use of certain handheld applications

Management and administration

- OTA deployment and management of Good and third-party apps like virus protection
- Centrally define and enforce policies (e.g. passwords and required applications)
- Robust policy templates and policy sets allow IT to customize policies by users, device OS and more
- Management dashboard provides a complete picture of your mobile deployment including server status and users by OS
- Option for SD Card install

*Good Mobile Messaging S/MIME is available for Microsoft Exchange 2003 and Microsoft Exchange 2007.

†Supports industry approved Bluetooth Smart Card readers (CAC readers)
