

Good™ Mobile Intranet

Fast, powerful access to your corporate intranet and beyond

Good Mobile Intranet brings the power of your corporate intranet and web-based applications to the handheld, enhancing the effectiveness of the mobile professional.

Most handhelds come with their own browser for surfing the Internet. However, since these browsers don't operate over a secure channel, they cannot access corporate intranets, which reside within the corporate firewall. Good Mobile Intranet is an advanced, secure browser for mobile devices, allowing the user to easily access both the corporate intranet and the public Internet.

Good Mobile Intranet can also be used to mobilize information held in corporate applications like analytics, reporting and enterprise applications, when those applications have been Web-formatted for Good Mobile Intranet.

RAPID BROWSING, WITH INCREDIBLE EASE.

Good Mobile Intranet tailors the intranet and Internet to the handheld device. By delivering only the most critical information in an easily readable way, Good Mobile Intranet accelerates the speed of business. Good Mobile Intranet is:

Faster and more powerful.

- Good Mobile Intranet is many times faster than competing intranet browsers; it is also faster than the standard Internet browsers that come with handhelds.
- Good Mobile Intranet can also access corporate applications that have been Web-formatted for Good Mobile Intranet

Intuitive.

- Good Mobile Intranet transforms Web pages so that they are easily viewed on small screens.
- With the ability to easily save critical Web pages and bookmarks, you can quickly find the information that you need.

Flexible.

- Download multiple pages simultaneously and easily move among Good applications.

Secure, Manageable, More Powerful.

Pleasing Both the IT Manager and the End User.

Good Mobile Intranet features the same secure mobile platform as Good Mobile Messaging, so you are assured that your confidential corporate information is secure. Good Mobile Intranet also uniquely provides manageability and information broadcasting features that place it above and beyond competitive browsers, so that IT can easily conduct management activities like the following:

- Push alerts and broadcast key information to users
- Manage user groups
- Monitor server traffic
- Review server logs and diagnose usage

TRANSFORMATIONS — THE KEY TO FASTER BROWSING.

Good Mobile Intranet transforms Web pages so that they are easily readable on a handheld's smaller screen. These transformations improve speed and increase user productivity. Custom transformations can also be done, so that high-value or frequently used Websites are specifically tailored to meet end user needs.

A financial Website as viewed on a desktop computer. There is a significant amount of extraneous information and images; it's not easily viewed on a handheld.

The same Web page, "transformed" by Good Mobile Intranet. It features only the information that you want and need, easily viewed on a handheld's smaller screen.

ACCESS INFORMATION HELD IN CORPORATE APPLICATIONS.

Good Mobile Intranet can help your mobile professionals go beyond the corporate intranet and access key information available in your corporate applications, such as analytics, reporting and enterprise applications. When corporate applications are Web-formatted specifically for Good Mobile Intranet, enterprise information can be easily viewed on your handheld.

Using Good Mobile Intranet to mobilize the Good Mobile Messaging Management Console.
